PLO	PART A - REPORT DOCUMENTATION					
	Criteria	**Excellent (4)**	**Good (3)**	**Fair (2)**	**Unsatisfied (1)**	**Marks**
PLO3	Introduction & Conclusion **[5marks]**	**Complete** and **well described** the Introduction sub-sections namely Scope and Overview. Concludes **overall** findings and lesson learnt	**Moderately complete** and **described** the Introduction sub-sections namely Scope and Overview. Concludes **some** findings and lesson learnt	The Introduction sub-sections namely Scope and Overview were described, but **insufficient** information provided. Concludes **insufficient** findings and lesson learnt	The Introduction sub-sections namely Scope & Overview and Conclusion section were **poorly** and **unclear** described with some **missing** information	
		[4 - 5]	[3 - 3.9]	[2 - 2.9]	[0 - 1]	
PLO3	Use Case specification - completeness **[20marks]**	**All identified use cases and at least one identified Misuse Case were described and provide complete documentation elements.** **For Use Cases: ID, Name, Actors, pre/post-conditions, NF, AF, EF.** **For Misuse Case: Misuse Case ID & Name, Misuse Actor (Attacker), Description, Threat Scenario (Flow), and Mitigation/Security Requirement.**	The developed specifications were moderately complete. Consists of most documentation elements for standard Use Cases. The Misuse Case is identified but may lack specific details (e.g., missing mitigation or specific Misuse Actor).	The specifications were incomplete and consist of inaccurate documentation elements. Misuse Case is either missing entirely or listed with no supporting details (only a title).	The specifications were poorly developed. Consists of inaccurate and missing documentation elements. No Misuse Case was identified or described.	
	User Story (User & Abuser) - completeness **[20marks]**	All identified User Stories and at least one Abuser Story were described and provide complete documentation elements. User Story elements: Unique ID & Name, standard statement format (As a, I want, So that), Priority, and comprehensive Acceptance Criteria. Abuser Story elements: Unique ID & Name, hostile statement format (As an attacker, I want to, So that), Threat Level, and Mitigation Criteria (Security Constraints).	The developed specifications were moderately complete and consist of most documentation elements for both story types. Includes User Story ID, Name, standard statement, and Acceptance Criteria, as well as Abuser Story ID, Name, hostile statement, and Mitigation Criteria.	The developed specifications were incomplete and consist of inaccurate documentation elements. Key elements like Unique IDs, statement formats, or Criteria are missing from either the User Stories or the Abuser Story.	The developed specifications were poorly developed, consist of inaccurate and missing documentation elements. Abuser Story is missing entirely, or both story types lack basic elements like IDs, proper statement formats, and Criteria.	
		[20 - 15]	[14-10]	[9-5]	[4-1]	

PLO3	**Use Case specification - correctness [20marks]**	**Correct** and **acceptable** (logic order) **flow of events** were specified in all normal flow (**NF**), alternate flow (**AF**), exception flow (**EF**). All **pre-conditions** (as constraints to begin use case execution) and **post-conditions** (as system's state after use case executed) were determined **correctly**. For the Misuse Case: The threat scenario is plausible, the logic of the attack is clear, and the proposed mitigation effectively counters the specific threat.	**Most** flow of events were correctly specified in normal flow (**NF**), alternate flow (**AF**), exception flow (**EF**). **Most pre-conditions** (as constraints to begin use case execution) and **post-conditions** (as system's state after use case executed) were **moderately** determined For the Misuse Case: The attack flow is logical, but the mitigation/security requirement is vague or only partially addresses the threat	**Incorrect** and inaccurate **flow of events** were specified in normal flow (**NF**), alternate flow (**AF**), exception flow (**EF**). **Incorrect and inaccurate pre-conditions** (as constraints to begin use case execution) and **post-conditions** (as system's state after use case executed) were determined. For the Misuse Case: The attack scenario is unrealistic or illogical. The mitigation does not relate to the threat described.	**Missing** and **poorly** specified the **flow of events** in normal flow (**NF**), alternate flow (**AF**), exception flow (**EF**). **Missing and poorly determined the pre-conditions** (as constraints to begin use case execution) and **post-conditions** (as system's state after use case executed) Misuse Case logic is completely missing or the scenario described is not actually a misuse case (e.g., confused with an error flow).	
	User Story (User & Abuser) - correctness [20marks]	Correct and acceptable logic were specified in all story statements. User Story: Role, Goal, and Benefit align. Acceptance Criteria are specified as testable conditions (Given/When/Then). Abuser Story: Threat agent and Attack vector are plausible. Mitigation Criteria are specified correctly as verifiable countermeasures that prevent the attack.	Most logic was correctly specified in story statements. User Story: Most Acceptance Criteria (as constraints/verification) were moderately determined. Abuser Story: Most Mitigation Criteria (as security constraints) were moderately determined and relevant to the threat.	Incorrect and inaccurate logic were specified in story statements. User Story: Incorrect or untestable Acceptance Criteria were determined. Abuser Story: Incorrect or inaccurate Mitigation Criteria were determined; criteria are vague or fail to address the specific security threat.	Missing and poorly specified the logic in story statements. User Story: Missing and poorly determined Acceptance Criteria. Abuser Story: Missing and poorly determined Mitigation Criteria; impossible to verify if the system is secure against the misuse.	
		[20 - 15]	**[14-10]**	**[9-5]**	**[4-1]**	
PLO3	**Natural language requirements documentation - correctness, completeness, feasible. [15marks]**	All functional and non-functional capabilities are documented. All identified requirements are written based on template/pattern with quality criteria consideration i.e. clear (unambiguous), atomic, correct,	Most functional and non-functional capabilities are documented. Most identified requirements are written based on template/pattern with quality criteria consideration i.e. clear (unambiguous), atomic, correct, complete and feasible (realistic).	Some functional and non-functional capabilities are documented. Some identified requirements are written based on template/pattern with insufficient standard of quality criteria consideration i.e. clear (unambiguous), atomic, correct, complete and feasible (realistic).	Functional and non-functional capabilities were missing and poorly documented. Identified requirements are poorly written based on template/pattern with poor standard of quality criteria consideration i.e. clear (unambiguous), atomic,	
		[15 - 10]	**[9 - 6]**	**[5 - 4]**	**[3-1]**	

PLO3	References [2marks]	**Complete** and **accurately** applied **APA style guidelines** in writing the cited references. **Totally** used only books, journals or other **reliable** internet resources.	**Moderately complete** and **accurately** applied **APA style guidelines** in writing the cited references. **Adequately** used only books, journals or other **reliable** internet resources.	**Incomplete** and **inaccurate** application of **APA style guidelines** in writing the cited reference. Used at least one book or journal source. One or more resources was Wikipedia or another unreliable resource.	**No** application of **APA style guidelines** in writing the cited reference. Used Wikipedia or other **unreliable** internet resources. **None** of the resources are books or from journals.	
		[2]	[1.5]	[1]	[0.5 -0]	
PLO3	Overall Report Quality [3marks]	**Complete** organization of report body with cover page, table of content, page number. **Minimum** typo errors	**Moderately** complete organization of report body with cover page, table of content, page number. Contains **minor** typo errors	**Incomplete** organization of report body with cover page, table of content, page number. Contains **some** typo errors	**Poor** organization of report body with cover page, table of content, page number. Contains **major** typo errors	
		[3]	[2]	[1]	0	
PLO3	List of Prrompts [5marks]	The list of prompts is **highly relevant, well-organized**, and covers a broad range of ideas that supported the user requirements deficition process.	The list of prompts is **relevant** and covers the main aspects but **lacks some depth or breadth** to suppoert user requirements deficition process.	The list of prompts is **partially relevant but may have gaps** or not fully address the user requirements deficition process.	The list of prompts is **irrelevant**, **incomplete**, or lacks sufficient depth to support the user requirements deficition process.	
		[4 - 5]	[3 - 3.9]	[2 - 2.9]	[0 - 1]	
PLO8	Presentation Creativity [10marks]	The presentation is highly creative, engaging, and well-organized. Visuals and tools are used effectively to enhance communication and engagement.	The presentation is organized, and visuals/tools are used but could be more engaging or professional.	The presentation is somewhat organized but lacks engagement or effective use of visuals/tools.	The presentation is disorganized, unclear, or lacks visuals/tools, significantly affecting communication effectiveness.
