Example of Review Report

Scenario: A group is reviewing a Use Case titled *"Withdraw Cash"* for an ATM system

Number	ID / Page	Reviewer Comment	Type	Reviewer Name	Additional Comments
1	UC-04 / Pg 12	Defect: The "Alternative Flow" for Insufficient Funds is missing. The system does not say what happens if the balance is too low. (Violates Checklist Item: "Are all alternative... paths triggered?")	MJ	Sarah	Logic gap; needs immediate fix.
2	UC-04 / Pg 12	Defect: In Step 3, the actor is referred to as "Client" but the Primary Actor is listed as "Bank Customer". (Violates Checklist Item: "Is the primary actor uniquely identified?")	MN	Sarah	Inconsistent terminology, but logic is clear.
3	UC-04 / Pg 11	Defect: The Post-Condition says "Money is dispensed" but does not mention "Account balance is updated." (Violates Checklist Item: "Can the post conditions always be met...?")	C	Mike	Critical data integrity issue.
4	UC-04 / Pg 11	Praise: The "Pre-Condition" regarding the card being valid is very clearly defined.	G	Mike	Good example for other use cases.
