Procedure

1. Setup

- Make ready your group Project 3 deliverables (Use Case Diagram and choose 3 Use Case Specifications).
- Ensure you have the Review Report Template ready to log findings.

2. Assign Review Roles

Assign the following roles within your reviewing group:

- Moderator (Reader): Leads the session and reads the use case flows aloud.
- Scribe (Inspector): Records the findings in the Review Report Template.
- Inspectors: Listen, analyze, and identify defects or improvements.

3. Walkthrough & Evaluation

Perform a detailed walkthrough of your group work. Use the Use Case Model Peer Review Checklist as your guide to evaluate the content.

A. Evaluate the Use Case Diagram (Overall View) Check the "Overall View of the Use Case Model" section:

- Completeness: Have all actors and use cases been identified? Do they account for all required behavior?.
- Mappings: Are all functional requirements mapped to at least one use case?.
- Relationships: Are include and extend relationships justified?.

B. Evaluate the Use Case Specifications Review specific Use Case Titles, Descriptions, and Flows using the checklist criteria:

- Primary Actor: Is the actor uniquely identified, and is the use case triggered by them?.
- Pre/Post Conditions: Can the system fulfill prerequisites? Are post-conditions met after successful execution?.
- Primary Path: Do steps lead logically from trigger to post-condition? Is it clear who is acting in every step?.
- Alternative/Exception Paths: Are branches correctly described and triggered by specific conditions in the primary path?.

4. Documenting Findings

Record every issue, defect, or improvement in the Review Report Template. Do not write on the checklist itself; use the report document.

Fill in the "Review Findings" table with:

- ID/Page: The specific location of the error in the Project 3 document.
- Reviewer Comment: A clear description of the issue (e.g., "Step 4 is ambiguous about which actor performs the action").
- Type: Classify the finding using the codes provided:
    - G (Good/Positive)
    - C (Critical)
    - MJ (Major)
    - MN (Minor)
    - Open Issue

5. Final Verdict

Once the review is complete, the Moderator must mark the overall result on the Review Report:

- Accepted as is
- Accepted with changes
- Rejected (new review needed)
