Use Case Model Peer Review Checklist

1. **Project Name:** _____ 2. **Release:** _____ 3. **Peer Review Date:** _____

4. **Project Manager/Office:** _____

5. **State of Product:** ☐ Draft ☐ Near Final ☐ Final

6. **Category:** ☐ Initial ☐ Follow-up

7. **Type of Review:** ☐ Meeting ☐ Coordination

8. **Work Product Name:** _____
9. **Location of Work Product:** _____
10. **Supporting Material and Location:** _____

12. PARTICIPANTS

Reviewer	NAME	OFFICE	ROLE/RESPONSIBILITY *(1st 2 roles are mandatory, others optional)*	Time spent on review before meeting
A)			Moderator	
B)			Scribe	
C)			Inspectors	
D)				
E)				
F)				
G)				
H)				

Use Case Specification ID		
13. Objectives	**Objective Evaluation Criteria**	**Respond With: Yes / No / N/A ****
Use Case Title	Can the goal be achieved by the system?	
Short Description	Does the description clearly describe the goal of the primary actor?	
	Does it deliver an overview of the main activities?	
Primary Actor	Is the use case triggered by at least one (primary actor)?	
	Is the primary actor uniquely identified?	
Pre-Condition (Prerequisites)	Can the system fulfill the required prerequisites?	
	Is it true that no checking of the prerequisites is done in the use case?	
Post Condition	Can the post conditions always be met after a successful development?	
Primary Path (Normal Path)	Do the steps lead from trigger to achieved post condition?	
	Are branches and loops correctly described?	
	Are exceptions described as such?	
	At conditions in the flow: Is it defined what procedure shall be taken if the condition is not fulfilled?	
	Can the steps be successfully executed?	
	Is it clear in all steps who is the acting actor?	
	Is it clear in all steps what the actor needs to accomplish?	
	Is none of the steps too complex?	

	Is there no design description in any step?	
	Is each step being described unambiguously?	
Alternative & Exception paths	Are all alternative and exception paths triggered by conditions in primary path?	
	Are the steps in the alternative and exception paths being described logically?	
Overall View of the Use Case Model		
A	Does the use case model clearly present the behavior of the system	
B	Have all use cases been identified? Do the use cases collectively account for all required behavior?	
C	Are all functional requirements mapped to at least one use case?	
D	Have all actors been identified?	
E	Is each use case involved with at least one actor?	
F	Have all non-functional requirements that must be satisfied by specific use cases been mapped to those use cases?	
G	Can all use cases be traced to a functional requirement?	
H	Does the document justify the use of all include- and extend- relationships?	
Other		
NOTE	For any item marked "No", determine if an action item should be entered in Section 14 below. For any item marked "N/A", provide justification in Section 15 below.	

14. Action Item Number from Section 13	**Action Item Description**	**Priority**	**Action Assigned To:**	**Date Action Item Was Completed**

15. Additional comments supporting the review:

16. TIME SPENT IN PEER REVIEW MEETING: _____.

17. FOLLOW-UP REVIEW REQUIRED: NO - YES (DATE: _____)

18. FACILITATOR SIGNATURE: _____.
19. Project Manager Signature: _____ Date: _____ **20. Lead Engineer Review: _____ Date: _____** **21. Program Manager Review: _____ Date: _____**
