User Story Checklist

The Statement

- [ ] Does it follow the standard format: **As a [User Role], I want [Action], so that [Benefit/Value]**?
- [ ] Is the **User Role** specific (e.g., "Returning Customer" vs. "User")?
- [ ] Is the **Benefit** actually a benefit and not just a repetition of the action?

Acceptance Criteria (AC)

- [ ] Are the criteria written in a pass/fail format?
- [ ] Do they cover the "Happy Path" (standard successful flow)?
- [ ] Do they cover "Edge Cases" (errors, invalid inputs, timeouts)?
- [ ] Are they focused on *what* the system should do, rather than *how* (technical implementation)?
