**SCSP3213: BUSINESS INTELLIGENCE – SEMESTER 2, 2025/2026**
**IN-CLASS ACTIVITY – CHAPTER 2**

---

**Objective**

To explore and present your understanding of Business Intelligence (BI) Architecture components based on your current knowledge.

**Goal**

This activity is to understand how BI systems work as a whole, not to memorise theory.

**Group Task**

You will work in groups. Each group is assigned **ONE** topic.

1. **Group 1:** Where Does Data Come From? (Data Sources)
2. **Group 2:** How Does Raw Data Become Usable? (ETL / Data Integration)
3. **Group 3**: Where Is Data Stored for Analysis? (Data Warehouse / Data Lake)
4. **Group 4:** How Do We Organise Data for Business Questions? (Data Modelling)
5. **Group 5:** How Do Business Users Understand Complex Data? (Semantic Layer)
6. **Group 6:** How Do We Turn Data into Insights? (Analytics & Reporting)
7. **Group 7**: Can We Trust the Data? (Governance & Security)

**Instruction:**

Prepare a short presentation (5–7 minutes) that includes:

- Explanation of your topic (in your own words)
- A simple diagram (your version of the concept)
- One real-world example
- One challenge or issue related to your topic
- One suggestion for improvement
