UNIVERSITI TEKNOLOGI MALAYSIA, JOHOR BAHRU

FACULTY OF COMPUTING

SECR2213-01 KOMUNIKASI RANGKAIAN (NETWORK COMMUNICATIONS)

SESSION/SEMESTER : 2025-2026/2

Section – 01

Network Design for Faculty of Computing Block N28B

Task – 1

Group Name: Project Axiom
Taqi Fatima Ellin A25CS4068
Priojit Saha A25CS4073
Atib Abrar A25CS4060
Ashfaque Alam AronnoA25CS4059

Lecturer: DR. ADNAN KHALID

Reflection on TASK-1:

Team members were able to acquire experience during the process of completing Task 1, in particular, the design of a two-storey Faculty of Computing building that can host various dedicated labs and learning areas. The reason we chose to use a near-square building design is that it offers a higher level of space management, reduced cabling lengths, and lower costs as opposed to a long-rectangular structure. The layout is also useful in arranging the network infrastructure in a better way which is relevant in future tasks.

Given that the building has two floors, we incorporated both the stairs and the elevator to make the building easily accessible and convenient to all users including physically challenged students. We took time to allocate the rooms in both floors and lab in an organized fashion to balance the weight and enable free movement easily. It featured a student lounge as a recreational and collaborative working place with Wi-Fi connectivity that accommodates both academic and social interests.

Moreover, we also provided special areas of a video conferencing room and a hybrid classroom to facilitate the contemporary learning techniques. The layout of the network rooms was also carefully considered to provide an efficient cable management and future expansion. We equally thought of a flat roof structure, which will be flexible in the future to upgrade it, including the addition of new infrastructure or equipment.

Though we were not experienced at first to produce proper floor plans with correct scaling and technical issues, we got better acquainted with it with the help of discussions, research and the assistance of our lecturer. This assignment made us reason more as network consultants, where to balance the requirements of the users, cost, accessibility and scalability in future during the planning of the building layout.

Group meeting details:

No.	Group Members	Time Arrival	Time Finish	Group Meeting Agenda				Other remarks: potential problems/ difficulties/ limitations
				Date: 01.04.2026		**Who took the notes:** ELLIN, PRIOJIT , ARONNO	**Who is Leading the Discussion:** ATIB	1.Finding the perfect software was initially difficult.
				No.	**Agenda Items that were discussed in the meeting**	**Who is talking and giving ideas?**	**What actions need to be taken? What do we need to bring**	2. Internet Issues.
1.	**Atib Abrar** **A25CS4060**	10PM	1AM	1.	Floor Plan	Taqi Fatima Ellin	Information Gather (YouTube, Research)	3. A bit initial Difficulties in using MagicPlan(as we used it for the first time)
2.	**Taqi Fatima Ellin** **A25CS4068**	10PM	1AM	2.	Selecting Software	Atib Abrar	Gathering Elements from Scratch	4. Difficulties in measuring.
3.	**PRIOJIT SAHA** **Matric ID - A25CS4073**	10PM	1AM	3.	Software implementation l	PRIOJIT SAHA	Measuring the Floor Size	
4.	**Ashfaque Alam Aronno** **A25CS4059**	10PM	1AM	4.	Searching Elements	Ashfaque Alam Aronno	Planning the Floor
