UTM UNIVERSITI TEKNOLOGI MALAYSIA | Faculty of Computing

PROJECT - TASK 1
NETCORE

Course Code : SECR2213

Course Name : Network Communication

Lecturer : Dr.Adnan Khalid

Academic Session: 2025-2026

Prepared by:

Matric No.	Student Name
A25CS4083	Leen Milhem
A25CS4084	Mohammad Sameera

Network Communication Project Report for Task 1

- ## Introduction:-

This task focuses on designing a simulation of schemes that the Faculty of Computing aims to implement in practice, and our design has aligned with the faculty's requirements.

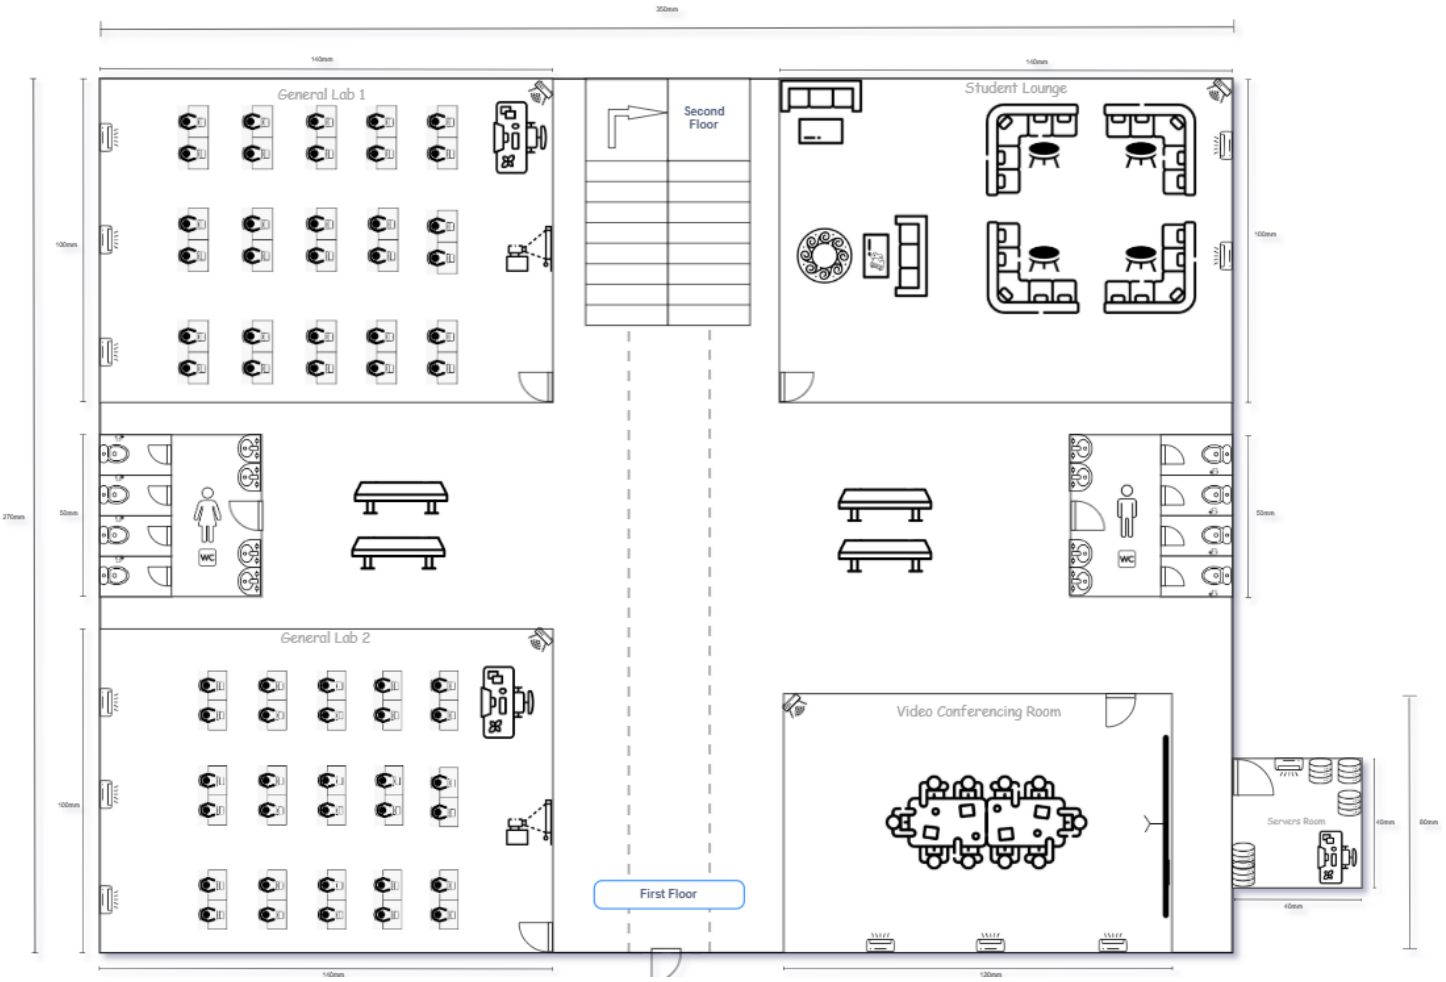

The layout consists of **two floors**: -

1. **The first floor**, which houses the **two general laboratories**, a **student lounge**, a **video conferencing room**, a **server room**, and restrooms.

2. **The second floor**, that houses the **Cisco lab**, **embedded lab**, **hybrid classroom**, **IDF room**, and Toilets, all in accordance with faculty requirements.

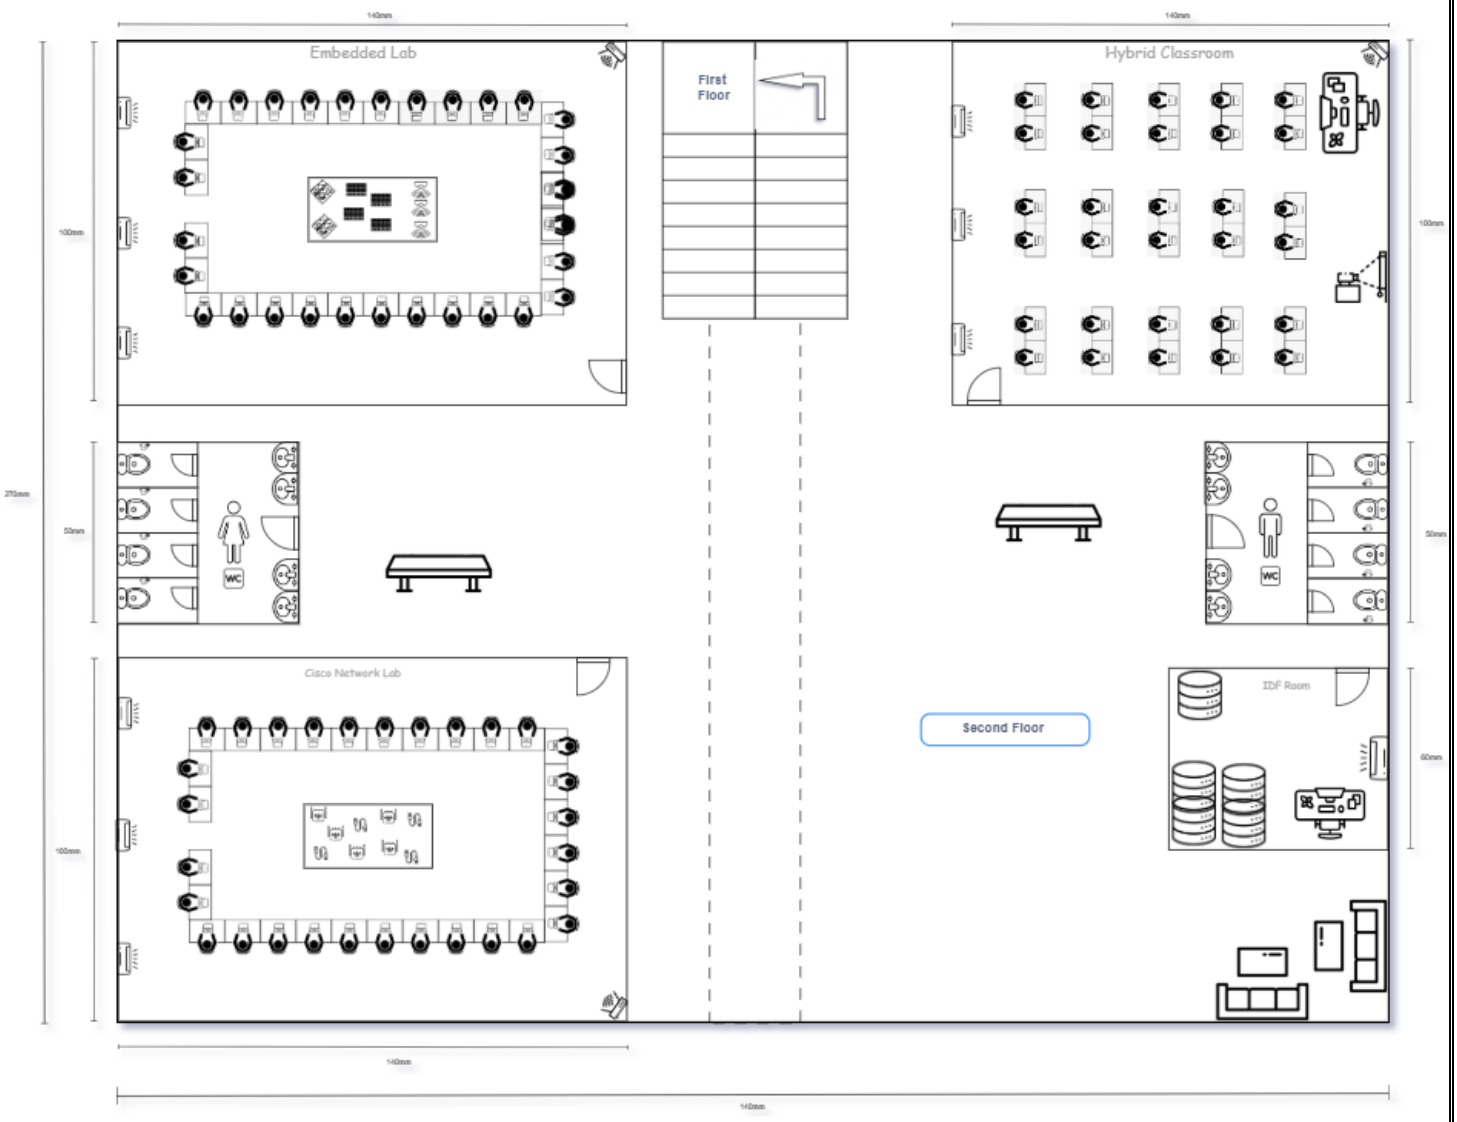

The laboratories and rooms have been carefully divided for specific reasons aimed at facilitating student movement within the building, and the scale of **10 mm = 1 m** has been used, which provides a clear representation of the space and its utilization.

- **First Floor: -**

This floor plan is for the first floor of the building. As shown in the image, the dimensions of this floor **are 35 x 27 meters**, clearly illustrating the layout of the rooms and laboratories. The general laboratories (each containing 30 computers, as required by the faculty) are located on this floor because most student lectures will be held there, facilitating student movement within the building. The rooms have also been designed to provide easy and uncomplicated internet access. A server room has been added to manage the building's network and provide connectivity to every computer within the building. A student lounge is also located on this floor to facilitate group gatherings after lectures or waiting before them.

- **Second Floor: -**

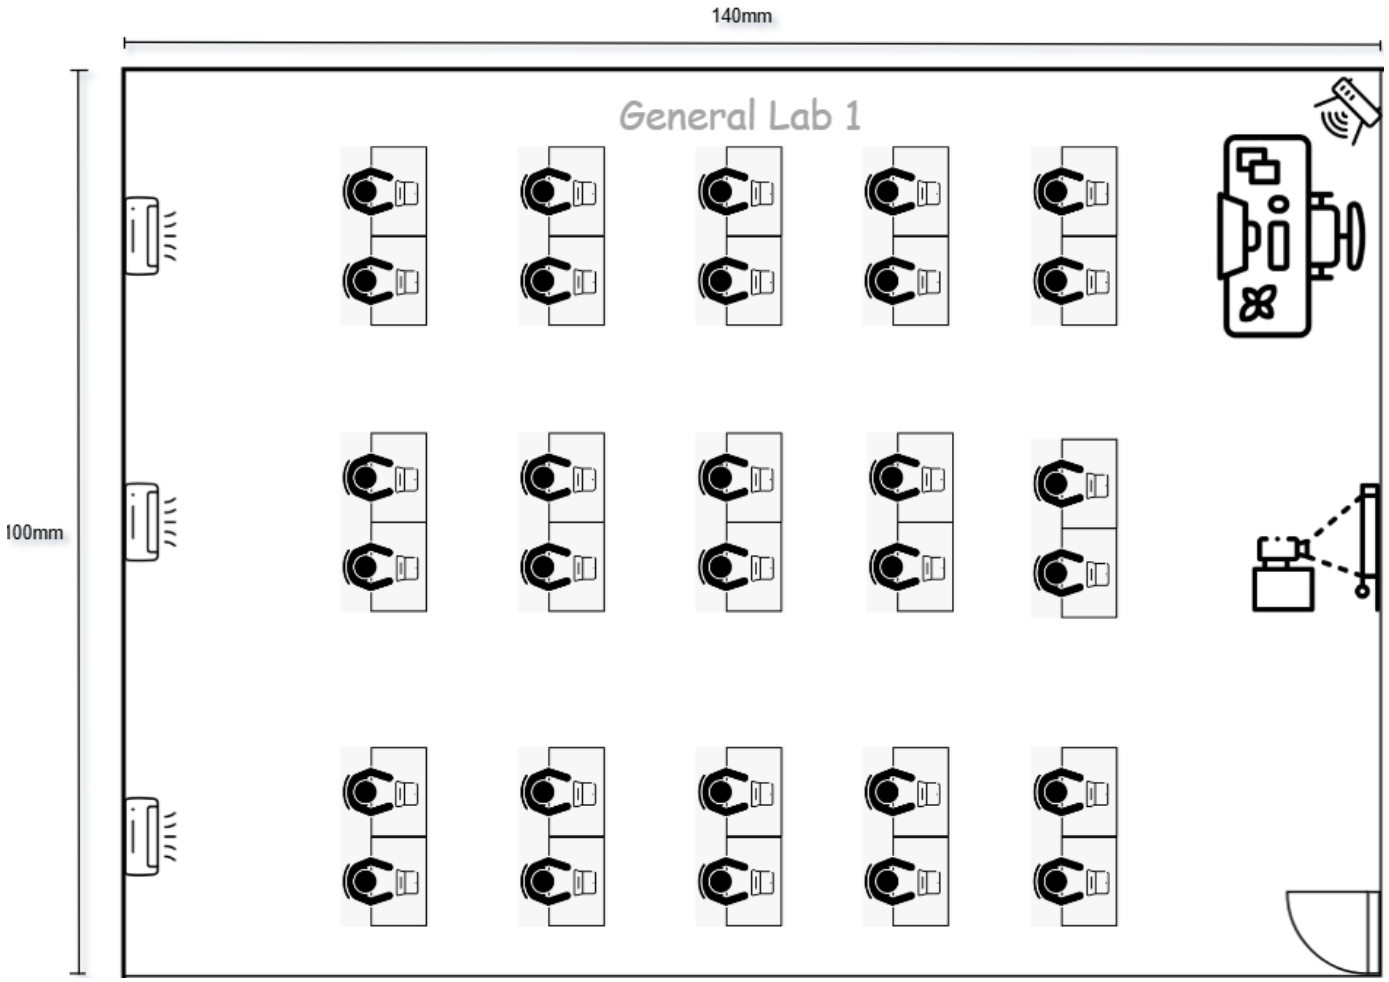

This floor plan is for the second floor of the building. As shown in the image, this floor measures 35 x 27 meters, which corresponds to the dimensions of the first floor, clearly illustrating the layout of the rooms and laboratories. This floor houses the embedded lab, designed to provide a suitable environment for the practical and theoretical development of embedded systems, as well as the Cisco lab, used for hands-on computer networking training. Additionally, there is a hybrid classroom, and an IDF room has been added to facilitate more efficient network distribution throughout the building.

- **Details of Some Rooms: -**

i. General Labs: -

Total: 2 Rooms
Location: First Floor
Size: 14m x 10m

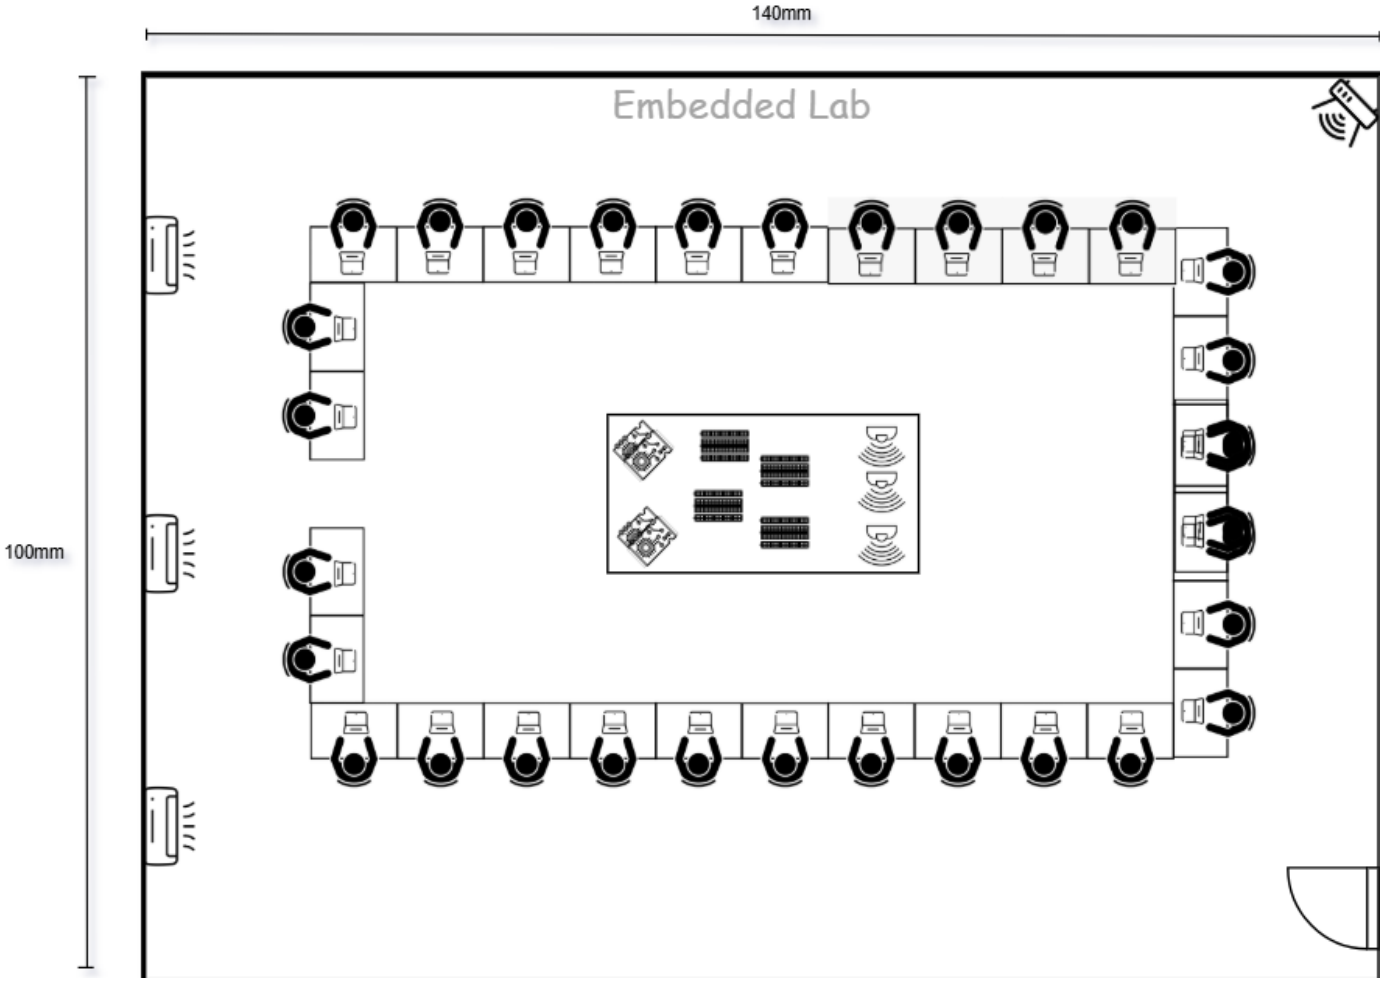

These rooms were designed to provide the appropriate environment that the student needs. A work area was allocated for **30 students** (as required by the faculty) containing a table and a PC. At the front there is a desk for the lecturer and a projector to facilitate the lecture and the educational process. The lab was also equipped with routers to facilitate internet access.

ii. **Embedded Lab: -**

Total: 1 Room

Location: Second Floor

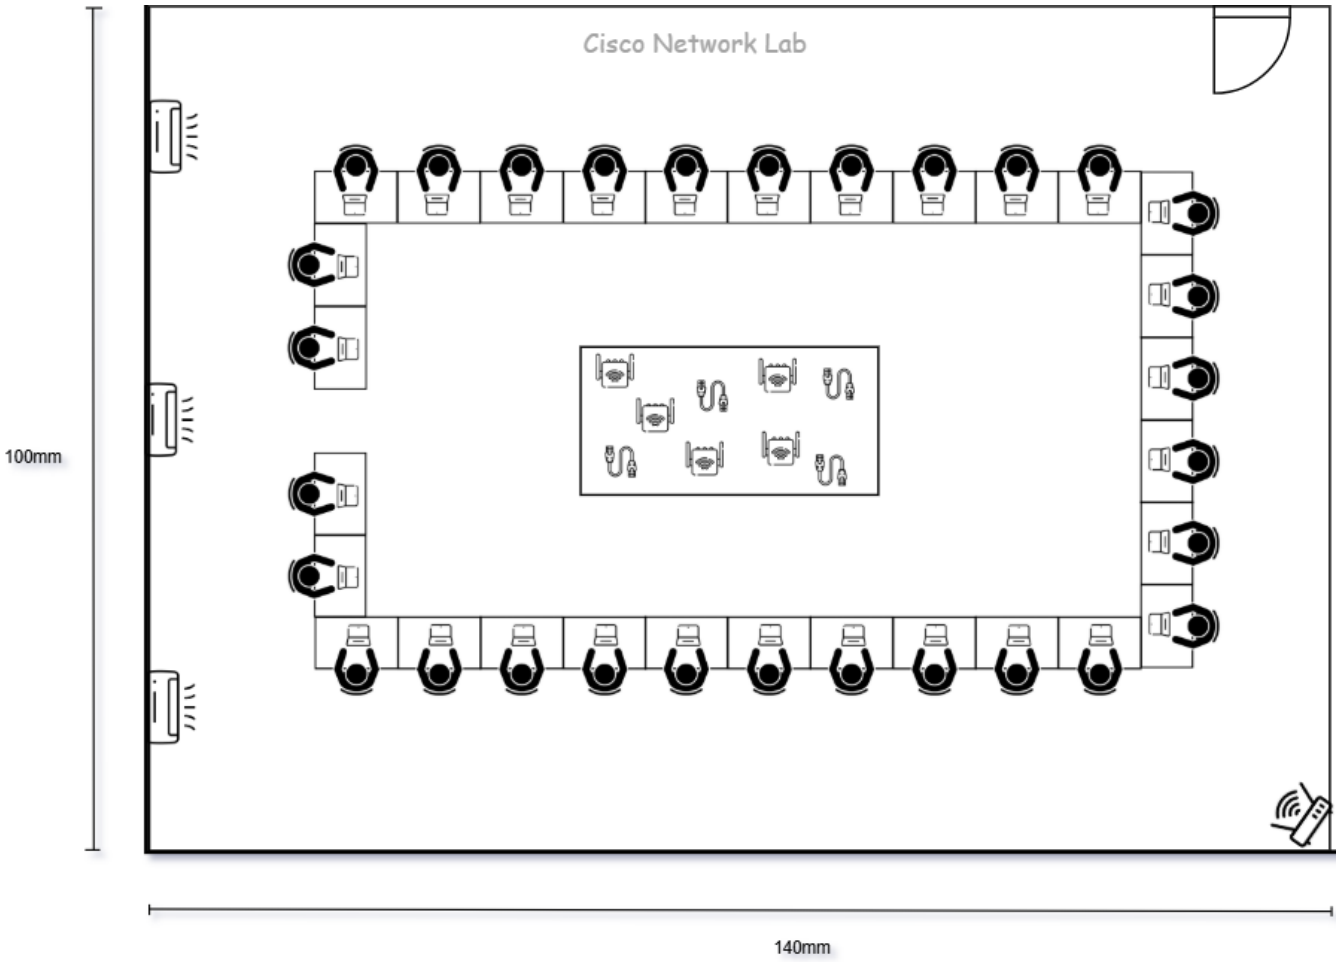

Size: 14m x 10m

This lab is designed to provide a suitable environment that combines theoretical and practical learning. It includes **30 workstations**, each containing a desk and computer, as well as a central worktable to facilitate practical work. Routers are also provided for easy internet connectivity.

iii. Cisco Lab: -

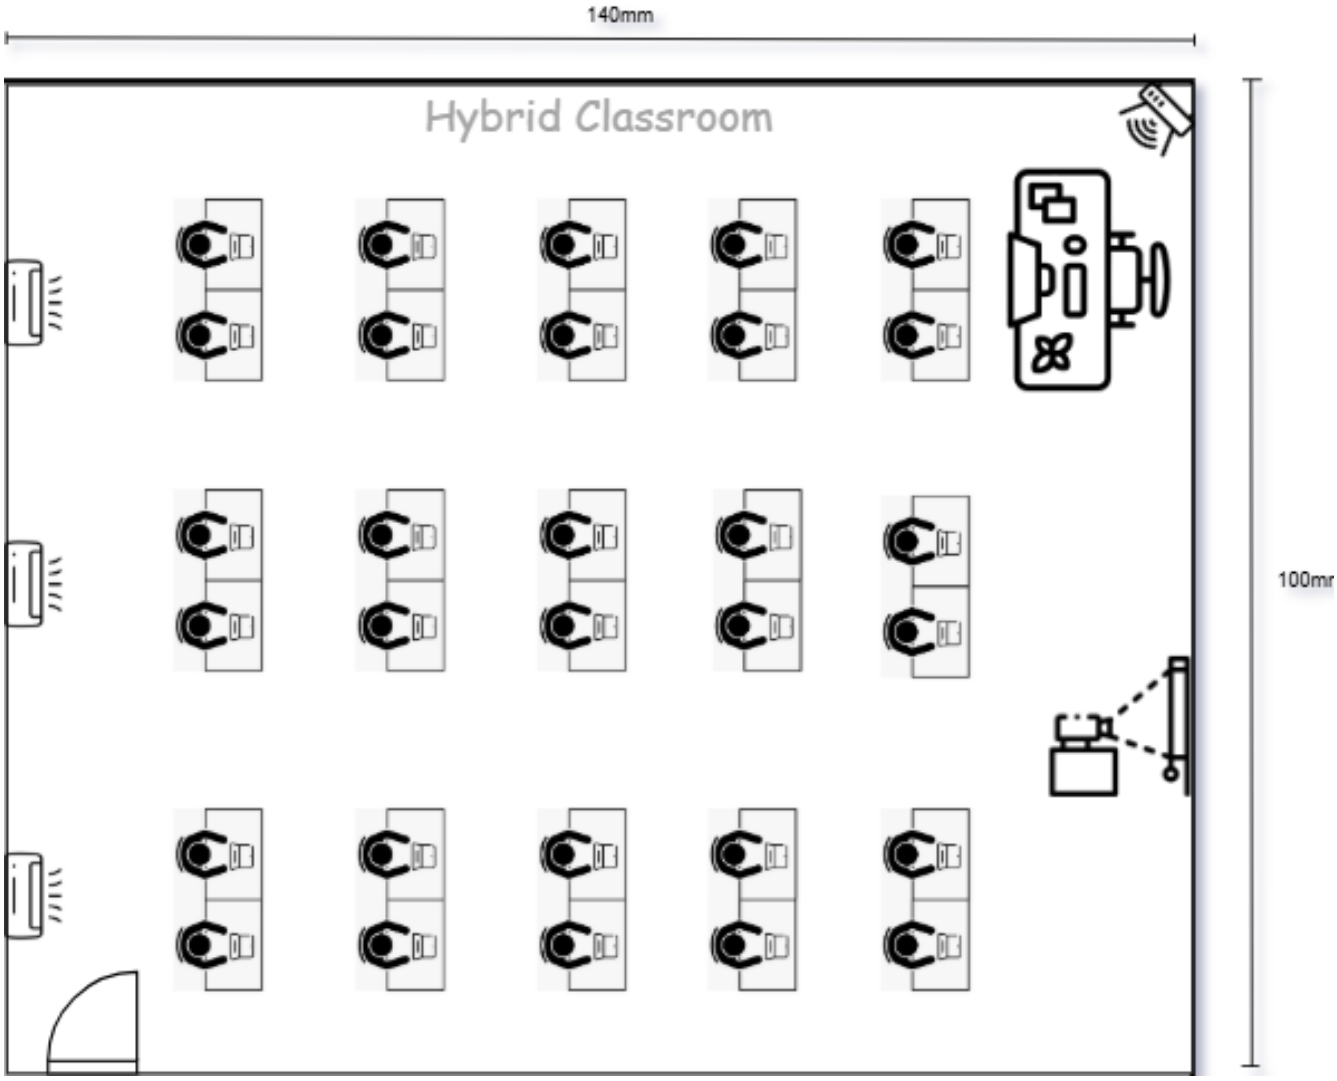

Total: 1 Room
Location: Second Floor
Size: 14m x 10m

This lab is used for the practical as well as theoretical study of computer networks. It is designed to provide the most suitable environment to meet this requirement, containing 30 work areas, each with a desk and a PC, in addition to a central table to assist with practical work. It is also equipped with routers to ensure a strong network signal throughout the room.

iv. Hybrid Lab: -

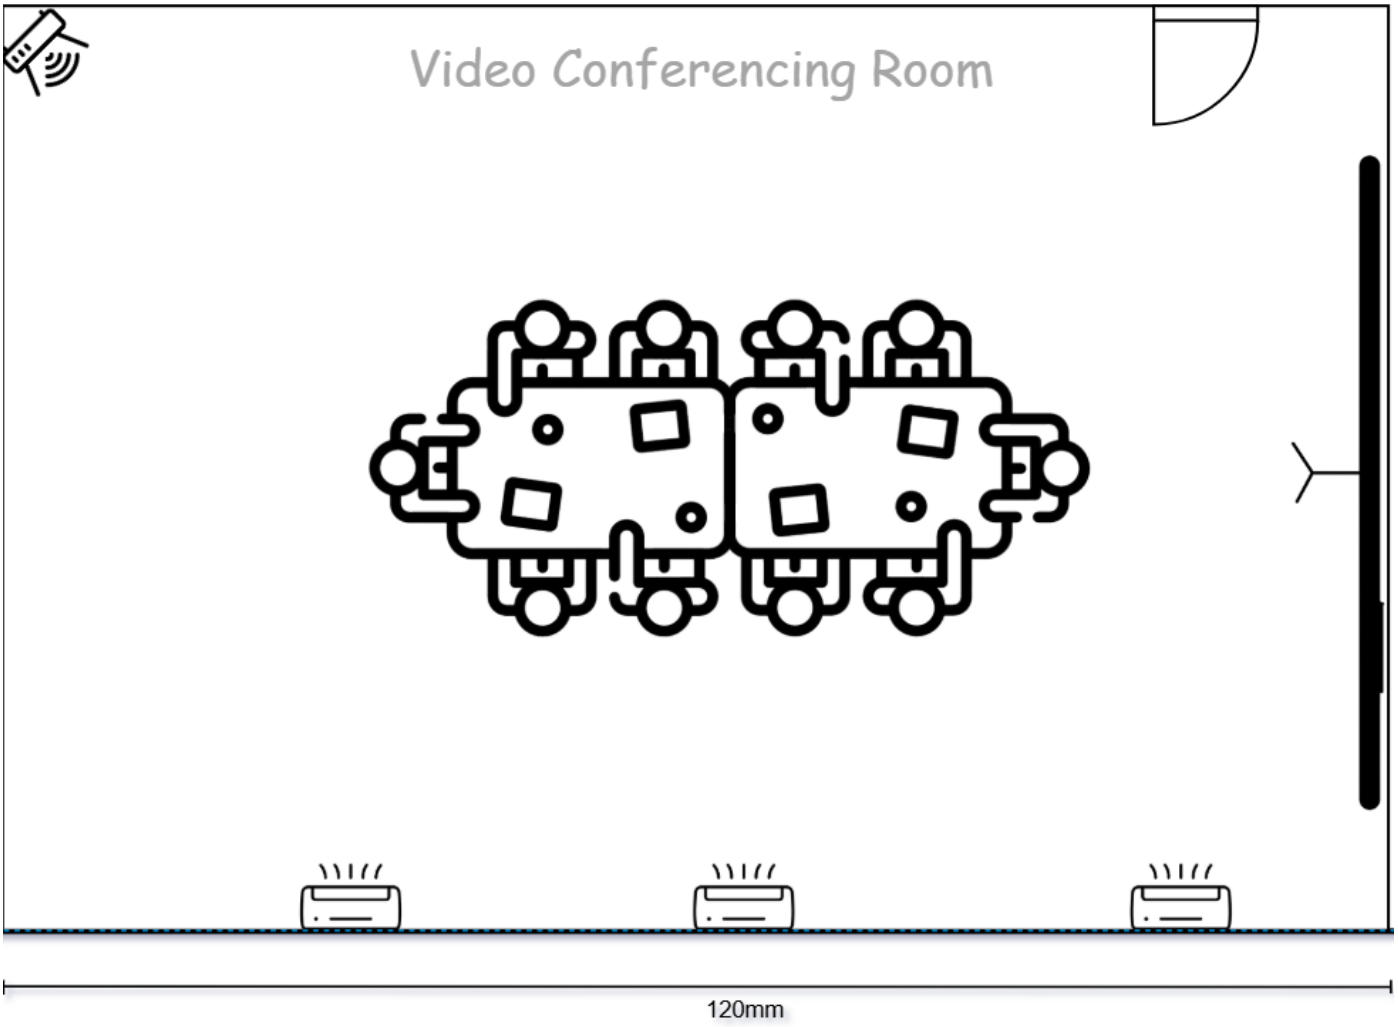

Total: 1 Room
Location: Second Floor
Size: 14m x 10m

A hybrid classroom combines face-to-face teaching with online, real-time involvement, allowing educators to interact with both on-site and virtual learners at the same time inside the faculty.

v. **Video Conferencing Room: -**

Total: 1 Room
Location: First Floor
Size: 12m x 8m

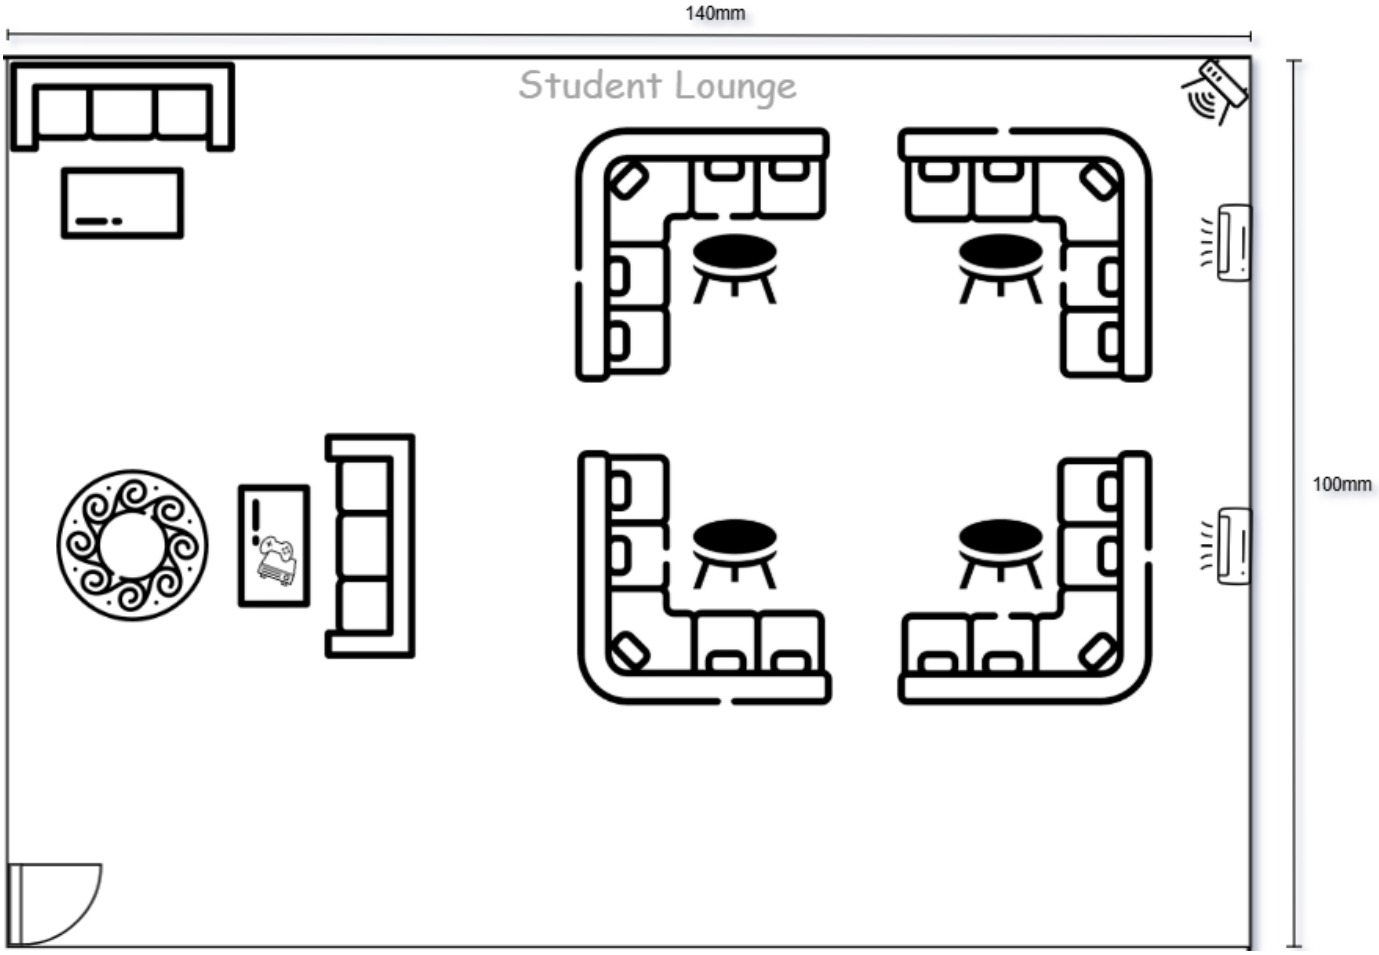

Designed for comfortable and uncomplicated meetings, even for those wishing to attend remotely, it is also equipped with routers to ensure a strong network signal throughout the room.

vi. Student Lounge Room: -

Total: 1 Room

Location: First Floor

Size: 14m x 10m

This room provides comfortable and convenient study conditions for students. It is equipped with routers to facilitate internet access, and it is also designed to provide opportunities for students to gather and relax a little.

- Meeting Minutes: -

DATE/TIME	31st. Mar. 2026 10 AM
LOCATION	Google Meet
AGENDA	Planning and completing Task 1 (Project setup, group formation, and floor plan discussion)
Meeting MC	Leen Milhem

ATTENDANCE		
NAME	**TIME**	**REASON FOR ABSENCE**
Leen Milhem	2:00	
Mohammad Sameera	2:00	

MINUTES			
NO.	**ITEM DISCUSSED**	**IDEAS/SUGGESTIONS AND PERSON GIVING IT**	**PERSON IN CHARGE & DATE**
1	Find name and file in charge	Leen suggested the name: **NetCore**	Leen (2nd /Apr/2026)
2	Software to use	Mohammad suggested using Draw io	Mohammed (1st /Apr/2026)
3	Floor design	Leen designed the 1st floor while the 2nd floor was done by Mohammad	Leen (1st- 2nd /Apr/2026) Mohammad (2nd /Apr/2026)
4	Next meeting	12th / Apr/2026	
5	Meeting ended	2:00 PM
