Question 45

Not yet answered

Marked out of 4.00

Consider the CRC is used for error detection and correction in the data link layer. Given D = 1101 0110 01, G = 10011, answer the following questions.

Time left 0:36:51

(a) How many CRC r bits?

Answer: r =

4

(b) What is the complete bit pattern that will be divided by G?

Answer:

1101 0110 01000

(c) Calculate CRC R value.

Answer:

0000

(d) What is the data transmitted by the sender to the receiver?

Answer:

1101 0110 010000

(e) Assumed the receiver received a series of bit 110101101100100 with G = 100111. Extract the CRC R value from the bits.

Answer:

00100
