UTM UNIVERSITI TEKNOLOGI MALAYSIA | Faculty of Computing

Course Code	:	**SCST1223**
Course Name	:	**PROBABILITY AND STATISTICAL DATA ANALYSIS**
Lecturer	:	SHAMINI A/P RAJA KUMARAN
Academic Session	:	2025-2026/2
Assessment Title	:	**Project Proposal Report (Phase 1)**
Submission Due Date	:	Wednesday, 8 April 2026, 5:00 PM
Prepared by	:	

Matric No.	Student Name
A23CS4026	MOHAMMED MOHSEN MOHAMMED ALSAKKAF
A25CS4079	Youssef Elsayed Abdelrazek Mahmoud Harraz
A25CS4065	Qusai Mahmoud Ali Hijazi
A25CS4074	Guo Siqi
A25CS4076	Mohammed Esam

Assessment Mode : Group Project

Feedback from Lecturer :

Student Declaration

I hereby declare that this assessment is my own original work. I have not plagiarised any sources and have not used generative AI tools unless explicitly permitted by the lecturer. All references used have been properly acknowledged.

Table of Content

1. Introduction.....3

1.1. Purpose of the Study:.....3

1.2. Problem Statement:.....3

1.3. Scope of Study:.....3

2. Data Collection.....4

2.1. Population and Sampling:.....4

2.2. Method of Collection:.....4

2.3. Variables and Levels of Measurement:.....4

3. Data Analysis.....5

3.1. Categorical Data Analysis:.....5

3.1.1. Graphs:.....5

3.1.2. Numerical: 5

3.1.3. Frequency Distributions:.....5

3.2. Quantitative Data Analysis:.....5

3.2.1. Graphs:.....5

3.2.2. Numerical Data Visualization:
Calculating the mean, median, and mode.....5

3.2.3. Measures of Central Tendency:
Calculating the mean, median, and mode.....5

3.2.4. Measures of Dispersion:.....5

4. Conclusion.....6

4.1. Summary of Findings:.....6

4.2. Learning Reflections:.....6

5. References.....7

6. Appendix.....7

1. Introduction

Explain the purpose of the study in your own words, why you were interested in the question and what you expected to see from the data.

1.1. Purpose of the Study:

State that the purpose is to investigate UTM students' habits and analyze their relationship with academic results..

1.2. Problem Statement:

Explain that you expect to see a positive relationship between disciplined study (like early preparation) and higher CGPA.

1.3. Scope of Study:

Define the target group as Universiti Teknologi Malaysia (UTM) undergraduate students.

2. Data Collection

2.1. Population and Sampling:

Data description including parameters or variables to be measured. .

2.2. Method of Collection:

Specify that data is gathered using a structured questionnaire distributed via social media platforms like WhatsApp.

2.3. Variables and Levels of Measurement:

T

3. Data Analysis

Note: All analysis in this section must be performed using R programming

3.1. Categorical Data Analysis:

3.1.1. Graphs:

Pie chart or bar chart (with percentages)

3.1.2. Numerical: .

Proportion and sample size in each category

3.1.3. Frequency Distributions:

Proportion and sample size in each category

3.2. Quantitative Data Analysis:

3.2.1. Graphs:

E.g., histograms or dot plots..

3.2.2. Numerical Data Visualization:

Calculating the mean, median, and mode.

3.2.3. Measures of Central Tendency:

Calculating the mean, median, and mode.

3.2.4. Measures of Dispersion:

(Optional but recommended) Calculating the range and standard deviation.

4. Conclusion

Write one paragraph summarizing what you learned.

4.1. Summary of Findings:

Write one paragraph summarizing what you learned.

4.2. Learning Reflections:

Write a one-paragraph summary on what you learned about the population you surveyed.
Explain what you learn mathematically and/or technologically from conducting this study?
Any final thoughts

5. References

List your sources.

6. Appendix
