SCST1223: Probability & Statistical Data Analysis

2024/2025 – Semester 2

PROJECT 2 (10%): Assessment Rubric

List Group Members:	TOTAL MARKS (40)
1.	
2.	
3.	
4.	

-EVALUATIONS-

Part A: Statistical Analysis: Overall Execution				
Item	**Mark**			
Hypothesis statement	**1**	**2**	**3**	**4**
Execution of test	**1**	**2**	**3**	**4**
Interpretation of results	**1**	**2**	**3**	**4**
Conclusion and discussion	**1**	**2**	**3**	**4**
Total	[_____/16] * 8 =			
Part B: Statistical Analysis: Selected Test				
Compulsory				
Item	**Mark**			
1 sample test or 2 sample test	**1**	**2**	**3**	**4**
Correlation	**1**	**2**	**3**	**4**
Regression	**1**	**2**	**3**	**4**
Optional (Choose at least 1)				
Goodness of fit test	**1**	**2**	**3**	**4**
Chi Square test of independence	**1**	**2**	**3**	**4**
ANOVA	**1**	**2**	**3**	**4**
Total	[_____/16] * 12 =			

Part C: Format & Content of Report				
Item	**Mark**			
Introduction	**1**	**2**	**3**	**4**
Focus on topic (Content)	**1**	**2**	**3**	**4**
Conclusion (Organization)	**1**	**2**	**3**	**4**
Grammar & Spelling (Conventions)	**1**	**2**	**3**	**4**
Total	[_____/16] * 10 =			

Part D: Video Presentation				
Item	**Mark**			
Content Accuracy	**1**	**2**	**3**	**4**
Sequencing of Information	**1**	**2**	**3**	**4**
Effectiveness	**1**	**2**	**3**	**4**
Delivery	**1**	**2**	**3**	**4**
Videography Clarity	**1**	**2**	**3**	**4**
Total	[_____/20] * 10 =			

Reference – Elements of Rubric:

Part A: Statistical Analysis (Overall Execution)

CATEGORY	4	3	2	1
Hypothesis statement	Null and alternative hypotheses stated correctly in words AND in mathematical terms.	Null and alternative hypotheses stated correctly in mathematical terms.	Null and alternative hypotheses not stated in mathematical terms or stated incorrectly	Either one of the hypothesis statement is not stated.
Execution of test	For required test: 1) test statistic is reported 2) test statistic is accurate 3) p value is reported 4) p value is appropriate	Three of the four criteria at left are satisfied	Statistical test not conducted or reported correctly	Statistical test was incomplete and not reported
Interpretation of Results	Results are interpreted correctly and consistently with respect to: 1) significance 2) rejection of null hypothesis 3) real world conclusion about subject being studied AND includes clear discussion of significance levels	Interpretation of p-values satisfies all criteria at left	p-values not interpreted correctly or consistently	p-values not interpreted
Conclusion and Discussion	Discussion of results is insightful; adds meaning and significance to the report; no unwarranted conclusions.	Adequate discussion of results and their practical implications; reasonable explanation of findings offered; no unwarranted conclusions.	Discussion draws unwarranted conclusions or uses inappropriately certain language (e.g., “we proved”, “our hypothesis is true”)	Implications of results not discussed; no attempt to explain findings.

Part B: Statistical Analysis (Selected Test)

CATEGORY	4	3	2	1
Statistical Analysis: Selected Test	Correct test is conducted and explanation of all details of test is thorough, articulate, and precise	Appropriate statistical test is conducted correctly and explained adequately	Inappropriate statistical tests conducted OR statistical tests not explained well	statistical tests conducted wrongly OR no explanation were presented

Part C: Format & Content of Paper

CATEGORY	4	3	2	1
Introduction (Organization)	The introduction is inviting, states the main topic & position and previews the structure of the paper.	The introduction clearly states the main topic & position and previews the structure of the paper, but is not particularly inviting to the reader.	The introduction states the main topic or position, but does not adequately preview the structure of the paper nor is it particularly inviting to the reader.	There is no clear introduction of the main topic, position or structure of the paper.
Focus on Topic (Content)	There is one clear, well-focused topic. Main idea stands out and is supported by detailed information.	Main idea is clear but the supporting information is general.	Main idea is somewhat clear but there is a need for more supporting information.	The main idea is not clear. There is a seemingly random collection of information.
Support for Topic (Content)	Relevant, telling, quality details give the reader important information that goes beyond the obvious or predictable.	Supporting details and information are relevant, but one key issue or portion of the storyline is unsupported.	Supporting details and information are relevant, but several key issues or portions of the storyline are unsupported.	Supporting details and information are typically unclear or not related to the topic.
Conclusion (Organization)	The conclusion is strong and leaves the reader with a feeling that they understand what the writer is "getting at."	The conclusion is recognizable and ties up almost all the loose ends.	The conclusion is recognizable, but does not tie up several loose ends.	There is no clear conclusion, the paper just ends.
Grammar & Spelling (Conventions)	Writer makes no errors in grammar or spelling that distract the reader from the content.	Writer makes 1-2 errors in grammar or spelling that distract the reader from the content.	Writer makes 3-4 errors in grammar or spelling that distract the reader from the content.	Writer makes more than 4 errors in grammar or spelling that distract the reader from the content.

Part D: Video Presentation

CATEGORY	4	3	2	1
Content Accuracy	All content throughout the presentation is correct. There are no factual mistakes.	Most of the content is correct but there is one piece of information that might be incorrect.	The content is generally correct, but one piece of information is clearly inconsistent or incorrect.	Content is in generally confusing or has more than one factual mistake.
Sequencing of Information	Communication of facts is organized in a comprehensible, logical way. It is easy to predict the type of material that might be on the video.	Most information is organized in a comprehensible, logical way.	Some information is logically sequenced. An occasional item of information seems out of place.	There is no apparent plan for the organization of information.
Effectiveness	Video includes enough material to give a deep understanding of the case	Project includes most material required to give an understanding	Video is missing more than two key points. It would make	Video is missing several key points and

	study. It is a highly effectivestudy.	of the case study, but is lacking one or two keypoints. It is a sufficient study.	an incomplete study.	has inaccuracies that make it a poor study.
Delivery	Presentation is very well prepared and delivers results in a clear and concise manner. Volume, pacing and gestures contribute maximally to the presentation.	Presentation is well prepared. Good voice volume, tone and pacing. Gestures supported overall presentation.	Presentation is somewhat prepared. Good voice volume, tone and pacing. Some appropriate gestures that supported the presentation.	Presentation is clearly unprepared. Poor voice volume, tone and pacing. Inappropriate gestures which detracted from the presentation.
Videography Clarity	The overall quality of the video and the focus is excellent.	Most of the quality of the video and the focus is excellent.	The quality of the video is not very good but the overall focus is excellent.	The quality of the video and the focus is not very good.
