SCST1223 – Probability & Statistical Data Analysis (PSDA)
SECTION 01

Class Instruction & Guidelines
By remaining in this class, students are assumed to have read and agreed to follow the class guidelines below. These rules are designed to ensure a smooth learning environment, effective communication, and academic professionalism throughout the semester.

1. Communication Channel
All official announcements and class updates will be communicated through:

- e-Learning platform
- Class Telegram Group

Telegram group link:

https://t.me/+VPYSfnaZpZE1MmE1

Students are expected to:

- Join the Telegram group as soon as possible.
- Do use your real name (to easily identify you).
- Check announcements regularly.
- Communicate respectfully and professionally.

If you have any questions, please ensure that you have first:

- Checked the previous announcements.
- Reviewed the lecture materials provided.
- Made a reasonable effort to search for the information.

If you are still unable to find the answer after completing the above steps, you may then proceed to ask your question.

2. Lecturer Response Time

- Responses may not be immediate during working hours, I will respond accordingly during working hours.
- Messages sent late at night or during weekends may be answered on the next working day.
- During weekends, I may not respond immediately, particularly if the matter is not urgent. I may have read the message (double blue tick), but responses will be provided during working hours.

3. Mass Lecture (Monday)

Mass lectures are conducted for multiple sections together.

Schedule:

Monday

11:00 AM – 1:00 PM

Location: BK2

Following is the ***schedule for Mass Lecture Class***:

					Selection of Lecturers for Physical Class Lecturing	
					MONDAY (BK 2)	THURSDAY (BK 2)
					11 AM - 1 PM	2 PM - 4 PM
Chapters	Topics	Sub Topics	Weeks	Dates	SECTIONS 1, 2	SECTIONS 1 - 3, 7
1	Introduction to Statistics	1.1: Introduction	1	16 - 22 Mar 26	Dr Seah Choon Sen (Online)	
		1.2: Data	2	23 - 29 Mar 26	Dr. Shamini A/p Raja Kumaran (Online)	
2	Data Description	2.1: Presenting Qualitative Data	3	30 Mar – 05 Apr 26	Dr. Shamini A/p Raja Kumaran	
3	Descriptive Statistics	3.1: Measurement of Central Tendency	4	04 – 12 Apr 26	Dr. Shamini A/p Raja Kumaran	
		3.2: Measurement of Dispersion				
4	Probability, Random Variables and Probability Distributions	4.1: Probability	5	13 – 19 Apr 26	Dr Seah Choon Sen	
		4.2: Random Variables and Probability Distributions				
5	Hypothesis Testing	5.1: Point Estimation	6	20 – 26 Apr 26	Dr. Shamini A/p Raja Kumaran	
		5.2: Hypothesis Testing for 1 Sample	7	27 Apr – 03 May 26	Dr. Shamini A/p Raja Kumaran	
		5.3: Hypothesis Testing for 2 Samples	9	11 – 17 May 26	Dr. Nur Eiliyah @ Wong Yee Leng	
			10	18 – 24 May 26	Dr. Nur Eiliyah @ Wong Yee Leng	
6	Chi-Square Test and Contingency Analysis	6.1: Multinomial Experiment and Goodness-of-Fit Test	11	25 – 31 May 26	Dr. Nur Eiliyah @ Wong Yee Leng	
		6.2: One-way Contingency Table				
		6.3: Two-way Contingency Table	12	01 – 07 June 26	Dr. Nur Eiliyah @ Wong Yee Leng (Online)	
7	Correlation and Regression	7.1: Correlation	13	08 – 14 June 26	Dr Seah Choon Sen	
		7.2: Regression	14	15 – 21 June 26	Dr Seah Choon Sen	
8	Analysis of Variance (ANOVA)	8.1 ANOVA with Equal Sample Size	15	22 – 28 June 26	Dr. Nur Eiliyah @ Wong Yee Leng	

Students must:

- Attend the lecture punctually.
- Bring necessary materials (notebook, calculator, stationaries).
- Pay attention to explanations and examples discussed.

Mass lectures will mainly cover:

- Concept explanations
- Worked examples
- Statistical interpretation
- Preparation for tutorial exercises

4. Tutorial Class (Thursday)
Tutorial sessions reinforce understanding through problem solving.

Schedule:
Thursday
10:00 AM – 11:00 AM
Location: BK7

Students are expected to:

- Attempt tutorial questions before class.
- Participate actively in discussions.
- Ask questions when concepts are unclear.

Tutorial classes focus on:

- Exercise discussions
- Problem solving techniques
- Clarifying statistical concepts

5. Attendance and Punctuality
Students are expected to:

- Attend both mass lecture and tutorial sessions regularly.
- Mass lecture attendance is also important
- Arrive on time.
- Inform the lecturer if there is a valid reason for absence.

Frequent absences may affect learning progress and assessment performance.

6. Classroom Conduct
Students should maintain professional academic behavior during class.

Please avoid:

- Disrupting the lecture
- Using mobile phones unnecessarily
- Talking while explanations are being given

7. Learning Responsibility
PSDA requires consistent practice and understanding.

Students are encouraged to:

- Review lecture materials after class
- Practice tutorial questions regularly
- Seek clarification early if concepts are unclear

8. Final Note
This course aims to help students develop analytical thinking, statistical reasoning, and data interpretation skills.

Students who attend consistently, practice regularly, and engage in discussions will benefit the most from this course.
